

F5 Professional Services Advanced Installation

F5 Professional Services executes on the company's paradigm of innovation by delivering a full-range of consulting services, including planning, design, installation, upgrades, migrations, optimization and application verification.

The Advanced Installation provides an F5 installation consultant working with your staff to ensure your F5 product installation supports your application infrastructure and business goals as effectively and efficiently as possible. The service includes in-depth business and application design review, network architecture considerations, traffic management strategies specific to your environment, application fine-tuning (for a limited number of applications) and a comprehensive overview of product maintenance and operations.

Key Features

Experience

Superior product knowledge is key to superior product support. F5's installation consultants know F5 products and business networking inside and out. The result? The traffic management network you need – the first time.

Best Practices

F5 products are incredibly flexible. Our consultants will help you choose and configure the features critical to your business success, leveraging F5 and industry standard best practices to ease operations and support.

Fast & Cost Effective

A smooth product deployment dramatically improves your ROI. Our experts work with you to fully understand your unique needs to ensure a streamlined and accurate deployment.

Knowledge Transfer

Learn what you really need to know about your F5 product deployment. Our consultants will demonstrate basic operations and troubleshooting, delivering critical product expertise to your staff so they can most effectively support your F5-enabled traffic management environment.

Advanced Installation Benefits

Personalization

Pre-install assessment conference call with you to review your technical requirements and make sure the scope of the project is understood and agreed upon by you and the F5 installation consultant. The pre-install assessment will include review of the pre-install worksheet.

Your staff will work shoulder to shoulder with the installation consultant during the installation process to ensure you understand the basic configuration and administration of our products.

Your installation consultant will introduce you to some of the advanced features you may want to deploy in the future.

Live introduction to Support via a conference call with a Support Manager, giving you and your staff an overview of the Support offerings, processes, tools and features.

Customization

White board session focusing on F5 technology and your applications, including deployment-specific design review and feature selection.

Custom configuration supporting your applications, including implementation of selected features and best practices application delivery network design.

Implementation specific knowledge transfer regarding the configuration steps and tasks important to your deployment.

Summary installation documentation and basic diagrams created by the installation consultant.

All travel and travel incidental costs are included in the List Price.

NOTE: Network performance tuning and comprehensive product training are not included. Please contact your account executive for scoping of additional services.
