|-------------------------------------------------------------------------|------------|
| <b>Module 1: Installation &amp; Access</b> .....                        | <b>1-1</b> |
| Course Overview .....                                                   | 1-1        |
| Installation Methods .....                                              | 1-2        |
| <b>Lab</b> – Initial Configuration .....                                | 1-5        |
| <br>                                                                    |            |
| <b>Module 2: Command Line Configuration</b> .....                       | <b>2-1</b> |
| Command Line using tmsh .....                                           | 2-1        |
| <b>Labs</b> – tmsh Configuration .....                                  | 2-14       |
| BIG-IP Configuration Files .....                                        | 2-17       |
| Command Line using bigpipe (v9).....                                    | 2-20       |
| Single Config File .....                                                | 2-28       |
| <b>Labs</b> – Editing config files .....                                | 2-32       |
| <b>Optional Labs</b> – bigpipe, SNAT, Monitor and SSL Termination ..... | 2-34       |
| <br>                                                                    |            |
| <b>Module 3: BIG-IP Administration</b> .....                            | <b>3-1</b> |
| Clustered Multi Processing (CMP) .....                                  | 3-1        |
| Connection Management.....                                              | 3-4        |
| VLAN and Network Options .....                                          | 3-6        |
| Restricting Access .....                                                | 3-10       |
| <b>Lab</b> – Packet Filters .....                                       | 3-15       |
| Command line tools .....                                                | 3-18       |
| Logging and Notification .....                                          | 3-30       |
| <b>Lab</b> – Remote Syslog Server.....                                  | 3-35       |
| <b>Lab</b> – SNMP Trap.....                                             | 3-36       |
| Administrative Domains .....                                            | 3-40       |
| <b>Lab</b> – Admins Domains and Partitions .....                        | 3-45       |
| <br>                                                                    |            |
| <b>Module 4: Monitors part 2</b> .....                                  | <b>4-1</b> |
| Monitors Re-visited.....                                                | 4-1        |
| Configuring Monitors.....                                               | 4-10       |
| Passive or Inband Monitors.....                                         | 4-17       |
| Manual Resume.....                                                      | 4-16       |
| <b>Lab</b> – Monitors part 2 .....                                      | 4-19       |
