

# Volume Licensing Subscription

Enabling F5 customers to add ADC services to every application

## VLS PROVIDES UNPRECEDENTED VALUE

**Flexibility**—Adopt advanced F5 functionality for every application.

**Simplicity**—Support dynamic application needs across private and public clouds.

**Best Value**—Save up to 67–78% over non-volume pricing.

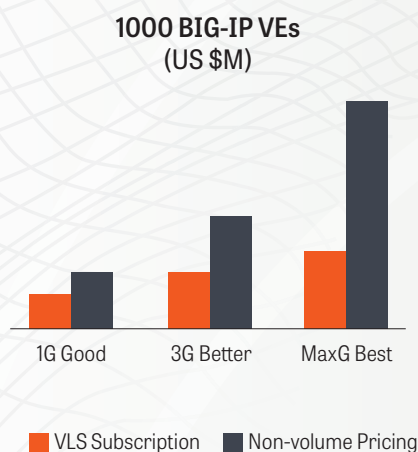

F5 Volume Licensing Subscription supports customers who need large volumes of VEs deployed on private or public clouds.

Leading enterprise IT departments are transitioning to cloud architectures and developing software-defined data centers that span private, hybrid, and public infrastructure.

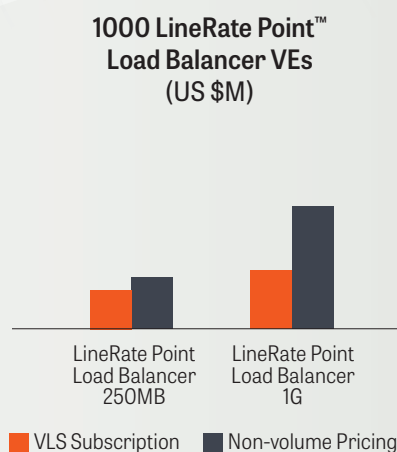

VLS offers:

- Large volumes of VEs with advanced F5 functionality
- Simplified OpEx purchasing model
- Available in 1- and 3-year subscriptions
- Premium support and software upgrades

## VOLUME PRICING FOR LARGE QUANTITIES OF VEs

At savings up to 67% over  
VE Version Plus Pricing

At savings up to 78% over non-VLS  
LineRate Point Load Balancer Pricing

To learn more about VLS, contact your F5 account manager.

## TWO PLATFORMS

### BIG-IP® Platform

- Powerful platform-based traffic management
- Flexibility and programmability
- Standardized VE fabric
- Premium support and software upgrades

### LineRate Platform

- Economical, scaled-out traffic management
- Standardized load balancing
- Premium support and software upgrades (alternative to self-managing NGINX or HAProxy)
