

## **F5 and CA eHealth Performance Manager**

### **Integrating the BIG-IP Local Traffic Manager and BIG-IP Global Traffic Manager with CA eHealth Performance Manager**

#### **About CA eHealth:**

CA is one of the world's largest IT management software providers. CA's software and expertise unify and simplify complex IT environments—in a secure way—across the enterprise for greater business results. CA serves more than 99% of Fortune 1000 companies, as well as government entities, educational institutions, and thousands of other companies in diverse industries worldwide.

#### **About F5:**

F5 Networks is the global leader in Application Delivery Networking. F5 provides solutions that make applications secure, fast, and available for everyone. By adding intelligence and manageability into the network to offload applications and optimize the data storage layer, F5 extends the power of intelligent networking to all levels of application delivery. F5's extensible architecture optimizes applications, delivers application reliability, and protects the application and network. Enterprise organizations, service providers and Web 2.0 content providers worldwide trust F5 to keep their applications running. The company is headquartered in Seattle, Washington with offices worldwide. For more information, go to [www.f5.com](http://www.f5.com).

IT managers need to ensure the performance and availability of the applications and services provided on networks. CA eHealth Performance Manager addresses this need by pinpointing performance degradation and generating reports that identify causes. CA and F5 have partnered to ensure that CA eHealth interoperates with BIG-IP Local Traffic Manager and BIG-IP Global Traffic Manager, helping assure that applications are always available, fast, and secure.

#### **Challenges**

Management of today's enterprise networks can be a very noisy affair as management tools bury IT managers in data. This data is in multiple formats, doesn't distinguish well between transient and persistent conditions and provides little predictability —making IT staff reactive, overburdened and inefficient.

#### **Solution**

CA eHealth Performance Manager unifies and automates performance management of multi-vendor, multi-technology networks with proactive, real-time analysis, distilling data from disparate sources across all technology silos into clear, predictive and actionable information.

CA eHealth Performance Manager maximizes IT infrastructure performance by proactively detecting degradations in real time before users and business processes are affected. IT operations move from reactive to proactive and become more efficient through CA eHealth Performance Manager intelligent real-time and information-rich historical reporting for all technology domains.

F5's BIG-IP Local Traffic Manager and BIG-IP Global Traffic manager have been certified for interoperability with CA eHealth Performance Manager. The joint solution helps provide rapid problem identification, resolution and proactive service assurance, ensuring high availability and performance of applications.
