

“Centrix’s Workspace Universal provides a unified access portal solution that will allow our customers to enable end user flexibility while maintaining IT control.”

Daniel Cartter, EMEA Director, Cloud Solutions & Services, SCH Group

The F5 and Centrix Software Solution

Key benefits

- Full user access across apps, data, and resources
- Single sign-on and a consistent workspace
- Easy-to-manage access policies
- Security within—and outside—your infrastructure

Together, F5 and Centrix Software have developed interoperable solutions that offer enterprise IT security along with next-generation user services—in a single offering. Centrix Workplace Universal provides application and content brokering, while the F5 BIG-IP® system delivers network security, application security, and access control. The result is integrated, best-of-breed solutions that give you an unprecedented level of secure, remote access to corporate resources.

Seamless and Secure Remote Access

The number of remote users and devices you support continues to rise. Today, enterprises must explore new ways to provide efficient and productive user experiences, all while maintaining flexibility, stability, and security in the network environment. F5 BIG-IP® Access Policy Manager™ and F5 BIG-IP® Local Traffic Manager™ coupled with Centrix Workplace Universal, deliver unified global access through a customizable, browser-based portal, while locking down network and application security. Your users get a stellar experience and remain productive; you get to free up your valuable IT resources, can efficiently support remote users, and remain in control.

Centrix Solutions

[Workspace Universal](#)

F5 BIG-IP solutions and Centrix Workspace Universal provide secure, comprehensive access to the network, applications, and data—delivering a seamless user experience and greater IT control.

Seamless User Experience

Give users access to a variety of services, applications, and resources through single sign-on, while delivering a common look and feel.

Secure Remote Access

From LAN access to wireless connections, users can confidently and securely access apps and data—anytime, from any location, and on any device.

Simplified IT Management; Greater Control

IT remains in tight control of access to corporate resources, applications, and content.
