# F5 and Apple
## PARTNERSHIP OVERVIEW

"We're very excited that F5 now offers enhanced support for iPad and iPhone devices. Being able to leverage our successful BIG-IP deployments to support mobile users is a big win for us."

Jake Seitz, Enterprise Architect, CoreLogic

## The F5 and Apple Partnership

**Key benefits**

· Fast, secure remote access
· Increased enterprise mobility
· Flexible integration options

F5 Networks,® as an Apple developer, has worked with Apple to provide organizations with protected access to network resources from numerous access points, including the Safari web browser as well as a wide range of Mac OS and iOS mobile devices. Through the partnership, F5 has developed a BIG-IP® Edge Client™ for Mac OS, and the BIG-IP® Edge Client™ and BIG-IP® Edge Portal™ Apps for the Apple iPhone, iPad, and iPod touch. These complementary apps, which work in tandem with BIG-IP® Edge Gateway,™ BIG-IP® Access Policy Manager® (APM), and the FirePass® SSL VPN solution, provide Apple users with convenient, secure, and accelerated access to enterprise resources.

For corporate users, anytime, anywhere access can result in significant productivity gains. As more and more users connect to networks through mobile devices, network administrators struggle to protect enterprise networks and applications from unauthorized access. The F5 for Apple solution enables administrators to extend policy-based application access for Apple users, in keeping with corporate security requirements and with full secure sockets layer (SSL) and virtual private network (VPN) protection. Access is easy, made possible through the Safari web browser or through clients provisioned by an administrator, a Mobile Device Management (MDM) vendor, or through an F5 iOS app obtained by the user, for free, from the App Store.

## Learn more

Please visit f5.com to access the following resources.
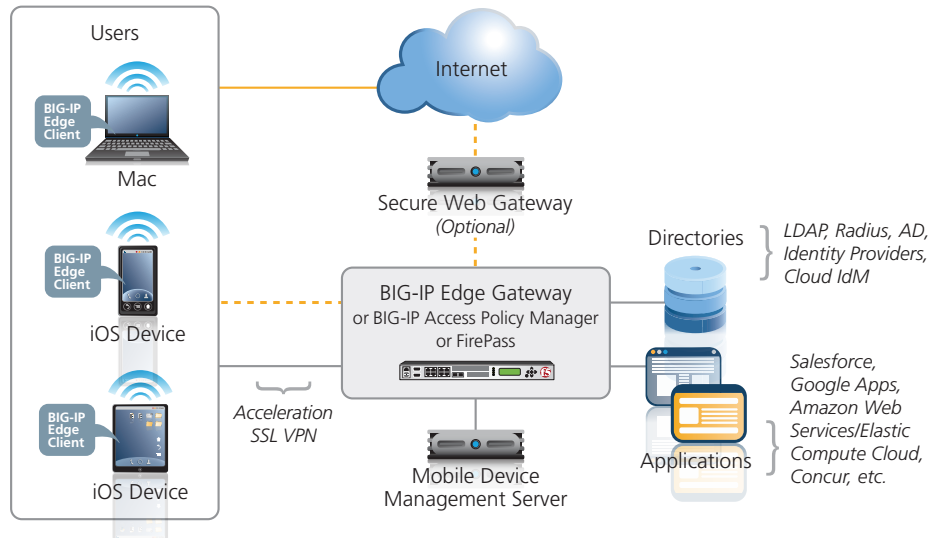

**Press release:**

· F5 Announces Two BIG-IP Apps Now Available at the App Store

**F5 technical briefs:**

· Secure iPhone Access to Corporate Web Applications (PDF)
· Secure iPhone Access to Corporate Web Applications (Audio)

**Image of interface:**

· BIG-IP Edge Client App and BIG-IP Edge Portal App (Image)

The BIG-IP Edge Client and BIG-IP Edge Portal on iOS devices provide secure remote access, enabling administrators to enforce corporate policies and to easily integrate the solution with a broad range of MDM and authentication methods.

### Fast, secure remote access

Gain accelerated and full Layer 3 VPN connectivity for iOS devices with BIG-IP Edge Client, BIG-IP APM, or FirePass.

### Increased enterprise mobility

Provide anytime, anywhere access to enterprise resources without compromising security.

### Flexible integration options

Enforce web browsing policies, enable split tunneling and auto-launch VPN, and integrate with most standard authentication methods and MDMs.

Available on the iPhone **App Store**
