F5 and PhoneFactor

PARTNERSHIP OVERVIEW

"Through our F5 partnership, we can ensure strong authentication in the F5 environment and provide a critical second layer of protection against escalating IT security threats."

Steve Dispensa, Chief Technology Officer, PhoneFactor

F5 and PhoneFactor Partnership

Key benefits

· Simplified, low-cost environment
· Protection against security threats
· Easier regulatory compliance

F5 Networks® and PhoneFactor have partnered to enable rapid, cost-effective deployment of phone-based multi-factor authentication in conjunction with F5 access implementations. The PhoneFactor platform protects enterprises and users by preventing costly, fraudulent account access and account takeovers in real-time, and is designed to work seamlessly with the F5 BIG-IP® product family.
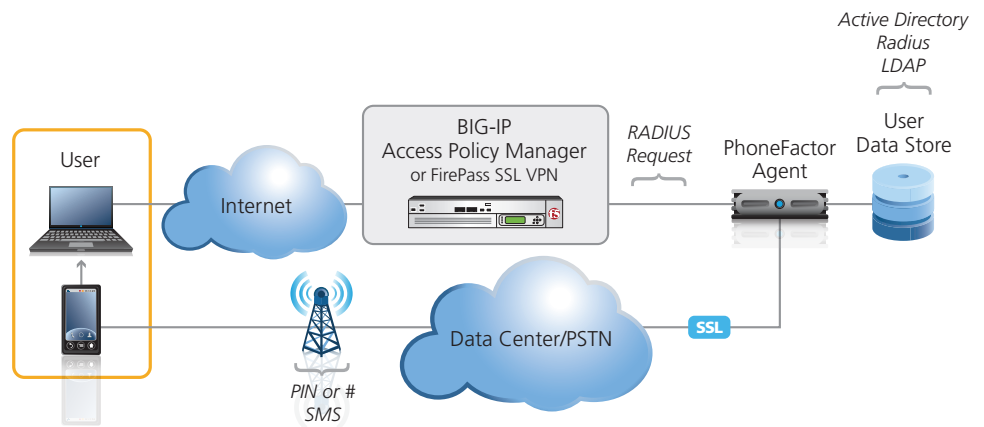

Enhanced Authentication with Reduced Cost and Complexity

PhoneFactor offers unparalleled ease of use, rapid deployment, and strong out-of-band protection against even the most sophisticated threats. The F5 and PhoneFactor joint solution reduces IT complexity and cost because it works instantly with any phone, anywhere, and does not require additional devices, software, or certificates. Users authenticate and gain access through all F5 access controllers by simply answering the call or replying to the text message sent from PhoneFactor.

resources about these topics.

· PhoneFactor Free
· PhoneFactor Standard
· PhoneFactor Extended
· SMS Text Authentication
· Biometric Authentication
· Transaction Verification

PhoneFactor provides strong authentication with one-time passwords or voice recognition over mobile phones for user authentication with BIG-IP® Access Policy Manager® and the FirePass® SSL VPN solution.

Simplified, low-cost environment

Provide users with a solution that doesn't require extra devices and is simple to implement and maintain.

Protection against security threats

Protect against the most sinister threats, including client malware, with PhoneFactor out-of-band authentication.

Easier regulatory compliance

Rapidly comply with multi-factor authentication guidelines and other industry regulations.
