F5 and PresiNET Systems

PARTNERSHIP OVERVIEW

"With the F5 and PresiNET solution, we achieve higher performance, best practices implementations, and get accurate snapshots of network health."

Curtis LeBoutillier, Senior Network Engineer, Vifor Pharma

The F5 and PresiNET Partnership

F5 Networks® and PresiNET have partnered to provide enterprises with comprehensive monitoring and reporting capabilities for application delivery. The F5 BIG-IP® product family, including BIG-IP® Local Traffic Manager™ (LTM) works with PresiNET TOTAL VIEW ONE appliances for easier implementations which give customers greater session and transaction visibility and result in faster processing, faster applications, and overall enhanced IT agility.
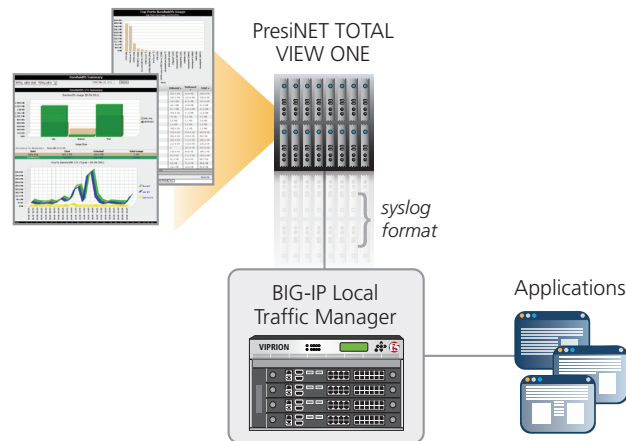

Improved Monitoring and Performance

F5 BIG-IP products and PresiNET TOTAL VIEW ONE help organizations focus on the life-cycle of network connections. Unparalleled monitoring capabilities, and enhanced network visibility, security, and compliance through end-to-end connection tracking, provide administrators with the ability to significantly improve network performance while keeping costs low.

BIG-IP Local
Traffic Manager

Applications

F5 products deliver a probe-less deployment of high speed logging of syslog data to PresiNET TOTAL VIEW ONE, which is used to create enhanced network and application visibility reports.

Maximized budgets and higher returns

Achieve positive return on investment
with enhanced network performance and
streamlined administration.

Effective, efficient management

Ensure effective bandwidth, transaction,
and security management with deep insight
into network connections, transactions, and
vulnerabilities.

Real-time alerting

Proactively address problems with real-time
alerts and rapid troubleshooting capabilities.
