

## Operational and Strategic Implementation Services (OASIS)

### Prepare for Future Needs with OASIS

When you set a goal to improve the efficiency and capabilities of your IT infrastructure, you know that an investment of time and resources will be required. But you might not know exactly what you will need, and when. An Operational and Strategic Implementation Services (OASIS) agreement from F5 can help.

With OASIS, you can make provisions for future services while reserving the option to decide which services you need at a later time. In one simple agreement, OASIS gives you access to all F5 Professional Services offerings and training. Whether used for planned changes or unforeseen events, OASIS can help you set the stage to successfully and economically achieve your IT goals.

#### Key benefits

##### Ease administration

Eliminate the delays often associated with financial approvals and terms and conditions reviews for new expenditures.

##### Maximize your investment

Ensure your implementation takes full advantage of the services that F5 offers to optimize ongoing operations.

##### Simplify planning

Reduce budget volatility by earmarking the funds you will need to access F5 resources to support your team.

##### Gain more value

Stretch your purchasing power with an investment in OASIS packaged services.

## OASIS Features

OASIS provides a flexible approach and fast access to securing the F5 Professional Services portfolio, including training. The OASIS packaged offering delivers a greater value for your upfront investment. Stretch your purchasing power and select the plan that is optimal for your situation while expediting the procurement time of the requested services and deliverables. With OASIS, you can sign up for services at the time you purchase an F5 solution and lock in the investments required to enhance your infrastructure.

### Initial assessment

Receive a one-day assessment of your F5 deployment by an F5 consultant. The consultant will provide recommendations for optimizing your solution for your IT infrastructure goals.

### Professional Services

Take advantage of F5 Professional Services consultants' deep F5 product knowledge and industry expertise to create a dynamic and adaptive infrastructure. F5 consultants can help you simplify deployment and maintenance, keep your technology running at peak performance, and ensure the reliability of your network and applications. Services include:

- Design and planning
- Implementation
- Configuration optimization
- Application deployment
- Upgrade and migration
- Design review and verification
- Application monitor development
- Custom scripting, including iRules® development

### Training

Accomplish more with your F5 technology by becoming an expert yourself. Learn the knowledge and skills necessary to establish and manage a solid and extensible infrastructure that enables IT agility. F5 offers several training options, including on-site, in-classroom, remote, and self-paced. You can select the delivery method that works best for you.
