# f5

Our Expert Security Analysts Extend Your SOC Team

F5® Distributed Cloud App Infrastructure Protection (AIP) Managed Security Services offers 24/7/365 alert investigation coverage. We'll help you go from billions of events to a handful of high-efficacy, manageable alerts.

CUSTOMER INFRASTRUCTURE

1,846,029,903
Events

Metadata about every action in your infrastructure is monitored continuously in the background.

DISTRIBUTED CLOUD AIP

2,340,007
Alerts

Distributed Cloud AIP processes events, running them against our alerting rules engine. On average only 1% of events trigger an alert. This broad collection of low severity alerts supports forensic investigations and custom audit trails.

DISTRIBUTED CLOUD AIP MANAGED SECURITY SERVICES

309
Severity 1 Alerts

High-severity alerts give you feedback on suspicious behaviors as they happen.
61
Security Operations Center (SOC) Cases

Distributed Cloud AIP Managed Security Services analysts research and validate Sev 1 alerts, dismissing known activity. Analysts escalate only after thorough investigation of the alert and related events.

17
Escalations

Our security analysts escalate Sev 1 alerts that require further action, with supporting data and specific context, along with recommendations on how your team can begin remediation.

Let our experts take your cloud security worries off your shoulders, so you can get down to business. To learn more or to schedule a demo, underline visit our website today.
