

# NGINX Plus Checkup

## Key Benefits

- Keep your configuration stable and secure as new features are added to NGINX Plus and your security and policy requirements evolve
- Ensure constant compliance with configuration best practices

## OVERVIEW

NGINX experts will review your existing NGINX Plus deployment for compliance with NGINX Plus best practices and will provide expert recommendations to ensure that your deployment is optimized for your business.

## Benefits from the NGINX Plus CheckUp include:

### NGINX Plus Infrastructure and Configuration Assessment

Assessment includes:

- Expert analysis of the existing NGINX Plus deployment environment and configuration
- Evaluation of constraints, existing component versions, and currently supported ones
- Flagging of configuration errors for remediation
- Flagging of missed performance optimization configurations for remediation
- Flagging of security vulnerabilities
- Identification of third-party modules and flagging of commercially unsupported ones

### Expert Recommendations for NGINX Plus Deployment Health

Recommendations are provided about:

- Upgrades to infrastructure and NGINX Plus
- Remediation activities to address identified security vulnerabilities
- Performance optimizations
- Error handling, messaging, and logging
- Professional services to accelerate next steps
