

“F5 and SMS PASSCODE have partnered to protect users against identity theft, through an extra layer of two-factor authentication for logging into corporate resources.”

Lars Barthold Nielsen, Vice President, Commercial Operations,
SMS PASSCODE

The F5 and SMS PASSCODE Partnership

Key benefits

- Enhanced security
- Protected remote access
- Cloud-ready design
- Lower cost solution

F5 Networks® and SMS PASSCODE have created a joint solution which seamlessly integrates SMS PASSCODE strong authentication into the log-in process of F5 BIG-IP® Access Policy Manager® (APM) and FirePass® SSL VPN devices to ensure easy and secure access to corporate resources. The close integration between F5 and SMS PASSCODE enables customers to take advantage of existing F5 or SMS PASSCODE infrastructure to transparently augment their environments with stronger authentication.

The F5 and SMS PASSCODE joint solution better equips an organization to deal with changing threat scenarios and the high risk of data and identity theft—while taking advantage of their existing infrastructure. F5 and SMS PASSCODE deliver a highly secure solution that provides quick time-to-value and lower costs than the alternatives. In the solution’s two-factor authentication scenario, a user authenticates to F5 BIG-IP APM or FirePass with username and password, and then receives an SMS PASSCODE-generated code via SMS, voice call, or secure email to the user’s mobile device.

- Product information
- Strategic alliances
- SMS PASSCODE live demo

SMS Passcode provides strong authentication with one-time passwords over mobile phones for user authentication with BIG-IP Access Policy Manager and the FirePass SSL VPN solution.

Enhanced security

Invoke real-time, two-factor authentication to protect against modern threats.

Cloud-ready design

Take advantage of a platform that can easily be distributed in cloud environments.

Protected remote access

Provide an intuitive user experience with a solution that easily connects with F5 BIG-IP APM and FirePass.

Lower cost solution

Achieve lower costs than with a traditional hardware token solution.
