

# The F5 and Ixia Partnership

## **Key benefits**

- $\cdot$  High scalability
- $\cdot$  Validated firewall performance
- $\cdot$  Advanced performance analysis

F5 and Ixia have partnered to help organizations better secure their IT assets against distributed web security threats that can overwhelm traditional network firewall solutions. With the joint solution, enterprises can deploy an application delivery firewall from F5 and validate performance, security, and stability through Ixia BreakingPoint to protect against a broad spectrum of Layer 4–7 attacks.

## A Highly Scalable Application Delivery Firewall

F5<sup>®</sup> BIG-IP<sup>®</sup> Advanced Firewall Manager<sup>™</sup> (AFM) and Ixia BreakingPoint work together to provide you with the most scalable application delivery firewall solution available so you can protect your mission-critical web applications. With Ixia BreakingPoint solutions, you can establish an ongoing security and performance testing regimen to understand how your firewall will behave under an attack scenario. With this advanced insight and actionable security intelligence, you can deploy an application delivery firewall with the scalability you need to ensure business continuity in the face of crippling cyber-attacks.

## Learn more

For more information about F5 and Ixia solutions go to www.ixiacom.com.

## Superior Performance and Scale

In validation test scenarios, conducted with Ixia BreakingPoint, the F5 application delivery firewall outperforms other firewall solutions and has a smaller footprint.

#### **High scalability**

Protect your mission-critical IT assets from the increasing number and sophistication of network, session, and application-level attacks.

#### Validated firewall performance

Gain peace of mind knowing that your application delivery firewall solution can scale to meet today's wide array of security threats.

### Advanced performance analysis

Measure and optimize the performance, security, and stability of your application delivery firewall solution.
