

“A fantastic story—the gold standards in Identity Verification (RSA) and Secure Remote Access (F5) combine, creating the ultimate in application security and availability.”

Benjamin Massin, CEO, The SCE Group

The F5 and SCE Group Partnership

Key benefits

- Simplify RSA Adaptive Authentication integration
- Implement strong, multi-factor access
- Get trusted deployment expertise
- Combine scale, performance, and security

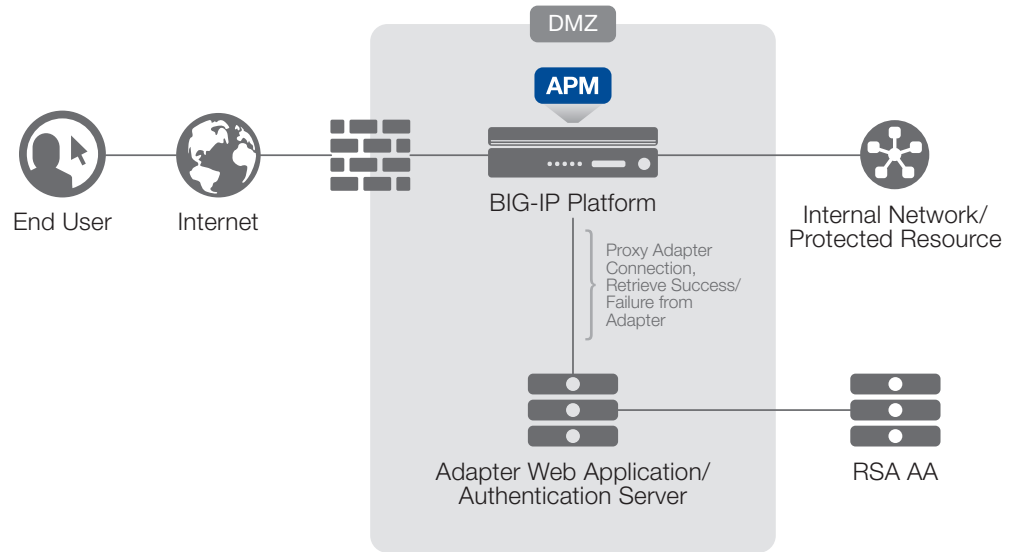

F5 and the SCE Group have partnered to integrate the increased security of RSA Adaptive Authentication (AA) with the universal access capabilities of F5® BIG-IP® Access Policy Manager®. Many organizations have begun implementing RSA AA to ensure user identity. The SCE Group’s adapter combined with BIG-IP APM help you balance your needs for security and usability as you protect your web-facing applications, defend against malicious attacks, and keep private information safe.

Integrate RSA Adaptive Authentication into BIG-IP APM

You need a complete access solution for your critical web-based applications that can handle today’s increased authentication requirements. The SCE Group’s adapter for BIG-IP APM can be deployed and integrated quickly and easily to provide your users with secure access to the applications they need. And the SCE Group’s professional services team makes it simple to integrate multi-factor authentication and access solutions with minimal disruption to your enterprise.

The SCE Group's adapter makes it easy to integrate RSA AA and BIG-IP APM.

Simplify RSA AA integration

The SCE Group's innovative plug-in delivers transparent integration of enhanced authentication.

Implement strong, multi-factor access

Ensure user identity and keep private information private, while allowing your users secure access to the applications they need.

Get trusted deployment expertise

The SCE Group has the dedicated experts and knowledge to help you integrate and deploy RSA AA quickly and easily.

Combine scale, performance, and security

Strengthen your enterprise's security posture without affecting the performance of your network.
